PROFESSIONAL SUMMARY

AI Automation Specialist with freelance experience since 2024 designing and implementing workflow automations, AI agents, chatbot workflows, document-processing solutions, and automated reporting systems. Hands-on experience with n8n, Make, Zapier, Power Automate, API integrations, advanced Excel, VBA, Google Sheets, Apps Script, and web applications. Combines automation expertise with professional experience in document control, reporting, auditing, internal controls, and process improvement, enabling the development of practical, organized, and reliable business solutions.

AI AUTOMATION CORE SKILLS

Workflow Automation: n8n, Make, Zapier, Power Automate, multi-step workflows, triggers, actions, conditional logic, error handling
AI Solutions: AI agents, chatbot workflows, prompt engineering, AI-assisted document processing, content automation
Integration and Development: REST API integrations, webhooks, logic-based workflows, web application creation, CRM tools, GoHighLevel
Data Automation: Advanced Excel, VBA, Google Sheets, Apps Script, dashboards, automated reporting, data analysis and visualization
Business Process Improvement: Workflow assessment, requirements analysis, repetitive-task reduction, internal controls, operational efficiency

SELECTED AI AUTOMATION PROJECTS

Dental Clinic AI Receptionist: Built a Messenger-based assistant that answers inquiries, retrieves clinic information, checks appointment availability, and books, reschedules, or cancels appointments.
Lead Intake and Task Automation: Automated Asana lead intake and task assignment using Zapier to improve routing, consistency, and response time.
Finance Reporting Workflow: Created an Asana-to-Xero transaction reporting workflow using Make to streamline financial data processing and reporting.
Document and Attachment Automation: Developed logic-based workflows for standardized file naming, attachment handling, filing, and document storage.
AI Job Scraper and CV Optimizer: Built an n8n workflow that collects job data and adjusts CV content according to job descriptions.
Excel and Google Sheets Business Systems: Developed inventory, sales, invoicing, dashboard, and reporting solutions using Excel VBA, Google Sheets, and Apps Script.
Content and Social Media Automation: Built AI-assisted content repurposing, Facebook engagement, and automated video publishing workflows.

PROFESSIONAL EXPERIENCE

Freelance AI Automation Specialist
Self-Employed | Freelance / Part-time
2024 - Present
Concurrent freelance work performed alongside full-time employment as a Document Controller

- Design and implement customized workflow automations using n8n, Make, Zapier, Power Automate, AI tools, webhooks, and API integrations.
- Build AI agents, chatbot workflows, automated reporting systems, document-processing solutions, and business process automations based on client requirements.
- Automate Excel and Google Sheets processes using formulas, VBA, Apps Script, dashboards, and web applications.
- Analyze existing workflows, identify repetitive tasks and control gaps, and translate business requirements into practical, maintainable automation solutions.
- Test, troubleshoot, document, and refine workflows to improve reliability, data visibility, response time, consistency, and operational efficiency.

Document Controller
Employer name not provided | Full-time
2019 - Present
Current full-time role maintained alongside freelance AI automation work

- Manage, organize, track, and maintain controlled documents and operational records to support accurate retrieval, accountability, and audit readiness.
- Develop Excel and Google Sheets trackers that improve monitoring, reduce repetitive data entry, and strengthen reporting accuracy.
- Prepare and consolidate daily production, manpower, and monthly activity reports for management review and operational decision-making.
- Maintain document registers, filing structures, revision records, and reporting logs to keep information current, complete, and traceable.
- Coordinate document submissions, updates, approvals, and follow-ups while supporting established procedures and internal controls.

Audit Supervisor
Employer name not provided
October 2014 - January 2019

- Reviewed operational processes, financial disbursements, and internal controls to identify compliance issues, inefficiencies, and potential risks.
- Prepared audit findings and practical recommendations to improve governance, accountability, and process effectiveness.
- Analyzed supporting records and operational data, coordinated corrective actions, and monitored implementation of recommendations.

Audit Supervisor
Employer name not provided
June 2011 - March 2012

- Supervised audit activities, reviewed records and controls, and supported accurate reporting of findings and recommendations.

TECHNICAL SKILLS

Automation Platforms: n8n, Make, Zapier, Power Automate, GoHighLevel
AI and Integration: AI agent design, chatbot workflows, prompt engineering, API integrations, webhooks, document processing
Data and Development: Advanced Excel, VBA, Google Sheets, Apps Script, web application creation, dashboards, data analysis, data visualization
Business Systems: Document control, operational auditing, internal controls, compliance, inventory control, QuickBooks, CRM tools

CERTIFICATIONS AND TRAINING

Training completed in Zapier, Make, n8n, GoHighLevel, and AI Prompt Engineering

EDUCATION

Bachelor of Science in Accountancy
Manuel S. Enverga University Foundation, Inc.
